

Your first GST invoice, in five steps

Apna Invoice - free GST invoicing for Indian businesses

1 Create your account

Enter your name, mobile number and email. We send a 6-digit code to your email - type it in to finish. No credit card is needed.

2 Add your business

Only two things are needed: your business name and your state. If you have a GSTIN, type it and your state is filled in automatically. Everything else can wait.

3 Add your customer

Name and state are enough. Add their GSTIN only if they are GST-registered. You can add a customer while making the invoice, without leaving the page.

4 Enter what you sold

Description, HSN or SAC code, quantity, rate and GST rate. The tax is calculated for you: CGST and SGST inside your state, IGST for another state.

5 Issue and send

Click Issue. The bill gets a permanent number and locks. Download the PDF, or send it on WhatsApp in one tap.

How the tax is decided

SITUATION	TAX APPLIED	ON ₹10,000 AT 18%
Same state	CGST + SGST	₹900 + ₹900
Different state	IGST	₹1,800
